The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.			
1. This communication is responsive to <i>interview of 6/24/05</i> .			•

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Gustavo Siller on June 24, 2005.

The application has been amended as follows:

- Claim 1, line 1: before "magnetic", the word "current-in-plane" was inserted;
 - o Claim 1, line 10: before "electrode", the phrase "a pair of" were deleted;
 - Claim 1, line 10: before "both", the phrase "is provided on" was replaced with the phrase "in contact with"; and
- Claim 30, line 2: the phrase "wherein3the" was replaced with "wherein the".

Reasons for Allowance

3. The present claims are deemed allowable over the references of record since the references of record fail to disclose or render obvious a current-in-plane (CiP) magnetic sensing element meeting applicants' claimed structural limitations.

While the prior art of record disclose current perpendicular to the plane (CPP) magnetic sensing elements possessing free magnetic layers meeting applicants' claimed structural limitations, the prior art of record fail to teach or render obvious a CiP sensing element meeting the claimed limitations.

The Examiner notes that CPP and CiP are known magnetic sensors wherein the primary difference is the location of the electrodes to provide the current either above+below (CPP) or to each side (CiP) of the MR element. The Examiner further notes that given the complexity of the prior art disclosed CPP sensors, moving the electrodes to provide a CiP type geometry is not deemed to be a nominal modification of the sensor, and hence the presently claimed CiP-type magnetic sensor is deemed to be neither anticipated, nor rendered obvious, by the disclosed prior art CPP structures.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin M Bernatz whose telephone number is (571) 272-1505. The examiner can normally be reached on M-F, 9:00 AM - 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carol Chaney can be reached on (571) 272-1284. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
